Subject: RE: Estimated GWUC projection for FY2015-2020 - action needed by Wednesday Aug 5th.
Date: Tuesday, August 04, 2015 12:01:00 PM

Diann,

The estimates for McGuire and Rolling Knolls are good.

Subject: Estimated GWUC projection for FY2015-2020 - action needed by Wednesday Aug 5th.

All,

HQs has asked that we provide our best estimate of projections for sites that should reach groundwater migration under control within the next five years.

Attached is the HQs spreadsheet of the sites which I have updated based on the planned RA completion dates, understanding that once the RA is complete we can determine if the site is groundwater migration under control. Please take a close look at these data and let me know if any of these FYs should be moved out.

The last column "Estimated Sufficient Data FY" is the dates that I have provided.

Please let me know by Wednesday August 5, if these are good planned FY estimates but keep in mind that if the FY date changes, I will also update your RA completions accordingly.

Carole.... This report includes the lead, everything else is the same.

Thanks!

Regards,

Diann Tramel
